

1 51916/RVW/S813

ABSTRACT OF THE DISCLOSURE

5 A lock assembly is provided having a deadbolt assembly with  
a deadbolt that is movable between an unlocked position, wherein  
the deadbolt is in a retracted position and a locked position,  
wherein the deadbolt is in an extended position. The lock  
assembly further includes a first lock actuator removably  
connected to the deadbolt for moving the deadbolt between the  
10 unlocked and locked positions and a second lock actuator  
connected to the deadbolt for moving the deadbolt between the  
unlocked position, the locked position and a lockout position  
wherein the deadbolt is connected to the second lock actuator  
but disconnected from the first lock actuator, rendering the  
15 first lock actuator inoperable.
